PROFESSIONAL SUMMARY

AI Engineer specialising in Generative AI, Agentic Systems, and Applied ML — building production-oriented apps with LangGraph, FastAPI, and PyTorch. Shipped FocusX (~91% model accuracy) during an AI/ML internship, ranked Top 5 Finalist at the TigerGraph GraphRAG Hackathon (84% LLM token-cost reduction), and maintain 35+ public GitHub repos spanning agentic pipelines, RAG systems, and full-stack AI products.

EDUCATION

ABES Institute of Technology, Ghaziabad
B.Tech – Computer Science & Engineering

2024 – 2028

EXPERIENCE

AI/ML Engineering Intern — Tranquiex Technologies

Nov 2025 – May 2026

Early-stage AI startup · Ghaziabad

- ▶ **Rakshak:** Built a ML and NLP-powered Women's safety platform using a fine-tuned DistilBERT sequence classification model for threat detection, integrated with GPS sharing and SOS workflows via Twilio and SendGrid; React + FastAPI stack.
- ▶ **FocusX:** Built the application layer on top of a pre-trained TensorFlow.js facial-landmark detection model for a real-time attention-monitoring use case, integrated model output into a custom attention-scoring pipeline with session tracking; Streamlit/FastAPI/SQLite backend.
- ▶ **StudyMind:** LangChain chatbot on DeepSeek (via OpenRouter API) for FocusX users — study-domain Q&A with per-session personalised context; added guardrails to filter off-topic/unsafe queries before generation.

Research Analyst Intern — Nebulyn

Oct 2024 – Apr 2025

Early-stage startup · Remote | Startup is now closed

- ▶ Automated data cleaning and feature engineering pipelines, reducing manual preprocessing time by 40%.
- ▶ Conducted EDA and prepared stakeholder-ready technical reports, translating research into actionable product insights.

PROJECTS

Rakshak — Women's Safety AI System · React · FastAPI · NLP · ML · Twilio · SendGrid · [GitHub](#)

- ▶ End-to-end ML and NLP based women safety platform using fine-tuned DistilBERT sequence classification model with real-time audio threat detection, live GPS, one-tap SOS (SMS/email), and guardian contact management.

FocusMate — Real-Time Attention Monitor · Python · MediaPipe · MobileNetV2 · XGBoost · FastAPI · Streamlit · SQLite · [GitHub](#)

- ▶ Two-model pipeline: MediaPipe Face Mesh → MobileNetV2 CNN for eye-state (~91% accuracy) → XGBoost for attention scoring; deployed with FastAPI/SQLite/Streamlit.

Research Mate — AI Researcher Agent · LangChain · LangGraph · Groq API · Multi-agent system · [GitHub](#)

- ▶ Multi-agent system with stateful LangGraph graphs and tool-calling nodes; autonomously queries live sources and generates structured research reports.

CredSight — ML and Agentic Credit Scoring System · XGBoost · LangGraph · LangChain · FastAPI · React · SQLite · Groq Llama · [GitHub](#)

- ▶ Hybrid scoring engine: XGBoost (60% weight, SHAP feature-importance explanations) + 4-agent LangGraph pipeline via Groq Llama (40% weight) produces a final credit score with per-factor reasoning; supports bulk CSV upload/download (ML-only) and single detailed PDF report.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, SQL

AI/ML: Machine Learning, Deep Learning, NLP, Statistical Modelling, Predictive Analytics

Generative & Agentic AI: LLMs, RAG, Multi-Agent Systems, LangChain, LangGraph, AutoGen, Prompt Engineering, AI Guardrails, Vector Databases (ChromaDB, Pinecone, Qdrant)

Frameworks & Libraries: PyTorch, TensorFlow, Scikit-learn, HuggingFace, MediaPipe, Pandas, NumPy, SHAP, Matplotlib/Seaborn

Backend & Deployment: FastAPI, Streamlit, REST APIs, SQLite

Tools & Platforms: Git, GitHub, Jupyter Notebook, ONNX, Twilio, SendGrid

CERTIFICATIONS

- ▶ [Oracle OCI GenAI Professional](#) · [OCI AI Foundations](#) · [Data Analysis with Python](#)
- ▶ [Data Visualization with Python](#) · [Introduction to AI in Azure](#)

ACHIEVEMENTS & OPEN SOURCE

- ▶ **Top 15 Team — JSS InOut Hacks 2026:** Ranked in top 15 teams at JSS InOut Hacks Hackathon 2026.
- ▶ **GSSoC 2026 Contributor:** Raised 10+ pull requests across open-source repositories during GirlScript Summer of Code 2026 — all merged.
- ▶ **TokenNinja — [GitHub](#):** GraphRAG + TigerGraph system achieving **84% reduction in LLM token cost**; **Top 5 Finalist** at the TigerGraph GraphRAG Hackathon; published [technical deep-dive](#) on Hashnode.
